

The 4-H Filmmaking Studio & Workshop

The 4-H Filmmaking Studio & Workshop, located at www.4-H.org/curriculum/filmmaking, is the online space to find tools and resources about video production and how to make your own film. On the home page of the site, you'll find the main Filmmaking Workshop—an 11 video “virtual workshop”, geared toward youth interested in making Science, Engineering, and Technology (SET) films. Although the workshop discusses SET as a primary topic area, the learning modes and principles apply across all topic areas.

Take your time and view each module. Practice with your camera, tell your story, and upload your film to share with others. This workshop was developed by 4-H in collaboration with Montana State University and TerraPod.

The 11 module virtual workshop presented in a carousel.

Video Resources

Downloadable PDFs and resources on topics such as *Choosing your Camera*, *Converting Footage*, *Uploading Your Video*, *Troubleshooting*, and more.

Test Yourself

3 short video clips and an interactive “what did you think?” section. Youth test what they learned about good video composition, narration, and varied screen shots.

Clips & Tips

3 science documentary clips with experts tips on the techniques that were used to produce the films.

Featured Films

Featured SET films on topics such as: wind power, water quality, adaptations, soil, and biotechnology.

Upload Your Video

Details on the uploading process will be available in the future.

Give Feedback

A short survey and assessment of the studio and workshop; data will be compiled and used to inform future projects.

Get the DVD

Information on how to purchase the Filmmaking Workshop DVD (www.4-hmall.org/curriculum).
